Who was Anne Frank?

Anne Frank was born in the city of Frankfurt in Germany. This was in 1929.

She moved to the Netherlands from Germany after Adolf Hitler came into power there in 1933 and made life very difficult for the Jews.

In 1942, she and her family went into hiding in a secret apartment behind her father's business in German-occupied Amsterdam.

Her Parents were Edith Hollander Frank and Otto Frank.

When they went into hiding, they had to keep quiet so they weren't heard.

I personally think that they lived a very sad life, having to hide away and live in fear just to stay alive!

I think everyone should be treated equally.
